IN A RAGEJealous Because Sweetheart  
Danced

## WITH ANOTHER MAN

Conrad Murr Stabbed Six Men Today  
at Newton, Long Island--Police Cap-  
ture Murr After Clabbing Him  
Into Insensibility.

New York, Aug. 26.--In a jealous rage because another man danced with his sweetheart it is said to have driven Conrad Murr to stab six men early today in Newton, Joseph Bendler asked the girl to dance with him and she accepted. As they stepped forth it is alleged Murr drew a sheath knife and cut his way to the door and escaped. All six men cut were seriously injured. Murr was captured after the policemen had clubbed him into insensibility.

TELEGRAPH STRIKERS  
ARE MORE HOPEFULSay Any Proposals for Arbitration Must  
Come from the Telegraph  
Companies.

New York, Aug. 26.--"Conditions are 50 per cent. more favorable to the strikers than they were last Monday. Any proposal for arbitration must come from the companies." This statement was given out at the local headquarters of the Telegraphers' Union, and reflects the enthusiasm aroused by the arrival of President Small from Chicago.

Union officials announced today that the Western Union has reduced or taken away entirely the bonus paid to strike-breakers, and that many of the operators are joining the strike. "We have assurances that one-half dozen chief operators will join us today," said Secretary Melner.

Officials of the company declared that the statement that they have reduced bonuses was sufficient evidence that they had plenty of men, but the strikers say it shows that the great loss of revenue demands the curtailment of expenses.

## CANNOT FILL COAL ORDERS.

Philadelphia, Aug. 26.--Because of its inability to fill the order, the Philadelphia and Reading Coal and Iron company was compelled to decline a contract for 200,000 tons of anthracite coal, the order for which was tendered by a representative of the Austro-Hungarian Chamber of Commerce. The proposed purchaser was willing to pay the regular price for placing the coal on board vessels either here or in New York.

Another order for 200,000 tons of bituminous coal wanted by the Italian government is also being offered to the largest soft coal operators in the United States, with little prospect of its being taken because of the expense of delivering to the Italian destination. Other foreign orders have been offered to American operators with lack of success.

The great demand for coal by foreign governments is attributed to the increased amount of coal consumed by their naval vessels, the number of which has grown rapidly within the last two years. All native coal is being used for this purpose and the supply is not equal to the demand. Added to this is the coal required for other government institutions as well as for industrial consumption.

## INCREASING OUTPUT.

Use of West Dummerston Granite as  
The Increase.

Brattleboro, Aug. 26.--There are indications that the force of men at the West Dummerston granite quarry is to be gradually increased, which is pleasing to the people of both Dummerston and Brattleboro. The quarry is known as the George E. Lyons granite quarry, but since the death of Mr. Lyons the controlling interest has been held by the Lyons family. Several large contracts will be filled at the West Dummerston quarry as rapidly as possible, and to facilitate the work an extra force of men has been put at work and improved machinery is being installed. Some years ago a large force of men was employed, but recently the number of men has been small, only such jobs being gotten out there that demanded that particular grade of granite. It is the belief of the Brattleboro directors of the company that within a few years the old-time activity will be resumed. The granite at the West Dummerston quarry is rated as among the best in the country, and the mountain at whose base it lies contains an unlimited supply. The supply at the Monson quarry is diminishing, and it is but natural that the owners should plan upon a more extensive development of the West Dummerston works. The superintendent of the West Dummerston quarry is T. J. Manning formerly of this town.

Necessary Say Dealers.

This raise of one cent a quart is made necessary, the dealers say, because of the increased cost of production, in feed, labor, delivery, and added care required to keep the milk clean. The dealers are only taking the same course that is being pursued throughout the greater part of New England, they say, and at a time of year when the cost of production and delivery always increases.
